Director's Report

2015 was another excellent year for TARS Research with important research projects for road safety authorities being completed and new, internationally important research projects commencing. The major highlights include production of the final report on our project on Quad bike safety for SafeWork NSW. Unfortunately, Quad bikes have a disturbingly poor safety record of rollovers and fatalities including for very young users of these forms of transport. This innovative project has helped us to understand more about why these injuries occur and has produced a safety rating system for quad bikes and side-by-side terrain vehicles that, for the first time, provides information to the purchasers and users of such vehicles for the workplace. The results of this project are contributing to changing the debate on quad bike and all-terrain vehicle safety internationally.

Another major highlight was the final report for our project on the Safety Camera Program in the ACT for the ACT government. This project showed a 6%-8% fall in speed that coincided with a 25% to 30% reduction in serious injury crashes on streets where cameras were present over the first few years of the program. The TARS research team found that the effect dissipated over time for reasons that are not entirely clear, but probably include reductions in enforcement of speeding infringements and reductions in public awareness of the program. This project reinforces the effectiveness of speed cameras especially mobile cameras for reducing speeding and importantly, it also suggested important directions for future action to strengthen and expand the benefits of programs using camera technologies.

One of the exciting developments of the year was the launch of the Australian Naturalistic Driving Study (ANDS). This project is the first of its kind in Australia and will involve collecting information on real-life driving behaviour of ordinary drivers over an extended period. The innovation in this project is that it gives us insights into what drivers normally do. How often and under what conditions do they take their driving to safety boundaries, such as exceed the speed limits, drive for very long periods without a break, take a corner a bit too fast, or take their eyes off the road for more than a few seconds? When these boundaries are approached or exceeded, why do drivers not crash? The other exciting aspect of this study is that it brings together four Australian universities as well as an American university which has experience in doing naturalistic driving studies as well as industry partners including government road safety authorities in five jurisdictions of Australia. TARS Research is leading the project and the ANDS team are very excited at the prospects that the results will present to change the way we think about road safety through changing the focus from reducing the impact of crashes to developing more creative ways of preventing them.

This year, TARS Research formally became a Centre of the University of New South Wales following a very favourable university review of our activities. While this addition to our name does not change what we do, it brings with it some more formal administrative structures. We now have a Steering Committee which is chaired by the Associate Dean Research for the Science Faculty, Prof Chris Tinney and includes the Faculty Finance Manager, Urania Stamios as a member. We are also very lucky to have Prof Richard Mattick from the National Drug and Alcohol Research Centre as an independent research representative. Richard has immense experience of running research centres in a related area and his wise counsel is very much appreciated. In addition, we will establish a Research Advisory Committee to assist us in shaping our research strategy and program.

This year we said farewell to three members of staff: Dr Rebecca Mitchell, Dr Mike Bambach and Dr Joanna Wang, all of whom moved on to the challenges of research and teaching positions at other Sydney Universities. All had been at TARS Research for a number of years and while we will miss them, we will continue our collaborations.

Last, but certainly not least, TARS Research has continued with our community engagement and global outreach activities. As can be seen in this Annual report, we have contributed to government inquiries on road safety on a wide range of activities. TARS Researchers make a contribution to exceptionally broad range of road safety authorities, other government departments, industry and professional bodies both domestically as well as internationally. These outreach activities are an essential component of our work as they ensure that the results of our research and that of others is relevant and has influence in decision-making on road safety and on policy and practice to attempt to safeguard both Australians and other country's citizens in all transport activities.

Prof Ann Williamson, PhD

Centre Director

Transport and Road Safety (TARS) Research Centre
School of Aviation

About the Centre

Who We Are

The Transport and Road Safety (TARS) Research Centre is a private and publically funded research centre in the School of Aviation at UNSW Australia. Our objectives are:

- Advancing transport and road safety through high quality research;
- Building research capacity; and
- Translating the results of research into policy and practice.

Background

In 1999, the Health Administration Corporation (HAC), Motor Accidents Authority of NSW (MAA), Roads and Traffic Authority of NSW (RTA) and The University of New South Wales (UNSW) formed a collaboration to fund the NSW Injury Risk Management Research Centre (IRMRC). The collaboration was renewed by Deed of Agreement, after a review, in 2002 and 2008 for a further five year period in each case. The IRMRC Deed of Agreement was varied to allow the establishment of the Transport and Road Safety (TARS) Research group within the School of Aviation and the Falls Injury Prevention Group (FIPG) within Neuroscience Research Australia (NeuRA) with oversight from the Director, IRMRC. The Deed of Variation (Variation) for each research group commenced on 1 December 2010 and expired on 30 November 2013. TARS Research now continues as a self-funded UNSW Research Centre in the School of Aviation.

Governance & Reporting

In accordance with the UNSW [Centres Procedure: Establishment, Management and Review of Centres and Institutes](#), a Steering Committee was established and met for the first time on the 24th of July, 2015. The TARS Steering Committee consists as follows with the Secretariat function provided by the Research Business Manager, TARS Research Centre:

- Professor Chris Tinney, Associate Dean (Research), Faculty of Science (Chair)
- Professor Jason Middleton, Head, School of Aviation
- Professor Ann Williamson, Director, TARS Research Centre
- Professor Richard Mattick, Professor, National Drug & Alcohol Research Centre
- Mrs Urania Stamos, Finance Manager, Faculty of Science

Skills and Expertise

The philosophy of the TARS Research Centre is the safe system principle, commonly used in occupational health and safety. This requires a multi-disciplinary approach to road safety research and policy development, where researchers focus on Safer Roads, Safer Vehicles, and Safer People and their integration into a Safe System approach.

TARS Research staff has enormous depth of multidisciplinary expertise and experience, and very strong nationally and internationally recognised track records of expertise across the entire range of road and transport safety. TARS research is structured around the essential disciplines needed for an effective transport and road safety research centre: safety policy and systems, psychology, human factors, engineering and crashworthiness, information technology systems, biomechanics, biostatistics, epidemiology, and social sciences.

TARS Research has 9 research staff covering 24 areas detailed in **Areas of Leadership and Expertise**.

Strategic Directions

TARS Research is focused on the key areas of research, community engagement and capacity building. We aspire to do this through:

- **Research**
 - Undertake high-quality research that benefits society
 - Be recognised as a peer in good standing with the world's best transport and road safety researchers
 - Build on current leading performance and continue attracting ARC, NHMRC and industry funding for strategic and innovative research
- **Community Engagement**
 - Translate fundamental science into new, evidence-based policy and practice
 - Equip government and industry to contribute to NSW, Australia and the world
 - Continue work towards the promotion of injury prevention measures, in a road environment, which supports the vision of zero fatalities and serious injuries within a Safe System approach
- **Capacity Building**
 - Maintain and extend our position as Australia's leading research centre in terms of road safety research output per capita
 - Be recognised as the research centre of choice for experts seeking to undertake transport and road safety research
 - Attract high calibre students seeking to undertake higher degrees in relevant areas
 - Maintain and enhance an environment that promotes collaboration between the range of disciplines required to meet the research needs of the challenges faced.

Our Research

Overview

TARS Research funding is from grants from the Australian Research Council, the National Health & Medical Research Council and industry, as well as research funding from other government and non-government authorities in Australia and internationally.

We also have a strong and consistent history of value-adding financial support from the transport and insurance industries. Our research is independent and conducted without fear or favour. We take on some of the most difficult and persistent road and transport safety problems. Our record of research is recognised in Australia and abroad.

Research Resources

We use the world's best practice facilities and tools for transport and road safety research including:

- Car, train and aircraft simulators for assessment of operator performance;
- Computer simulation software and laboratory facilities for conducting simulated and physical tests, in areas such as vehicle crashworthiness and injury biomechanics;
- Instrumented vehicles for driver performance studies and Naturalistic Driving Studies and instrumented aircraft for Naturalistic Flying Studies (under development);
- Video/photographic equipment for site investigations and audits; and access to equipment via NSW Roads & Maritime Services Crashlab for crash, stability, biomechanics and dynamic handling tests;
- Access to population-based information on Australian road and transport-related mortality including the National Coronial Information System (NCIS), injury morbidity and mortality data from police-reported crashes and third party compensation claims following trauma as well as hospital and Emergency Department (ED) data on road trauma in NSW.

Prizes and Awards

Fellow of the Royal Society of New South Wales

Prof Ann Williamson was elected Fellow on the 2nd of September, 2015.

The category of Fellow recognises the substantial contribution made by residents of NSW who are leaders in their fields within the disciplines of science, art, literature and philosophy.

NSW SafeWork Certificate of Appreciation

On behalf of the Centre, TARS researcher Lori Mooren accepted a Certificate of Appreciation from SafeWork NSW for assisting the agency in the development of a program to address safety in the road-freight transport industry.

The road freight transport industry is one of the highest risk industries both nationally and in New South Wales (NSW) because of the high number and rate of injury and /or fatality. WorkCover NSW (now SafeWork NSW) invited Lori Mooren from TARS, and other leading stakeholders in the road freight industry to take part in the development of a program to address safety.

In May 2013 as part of its Focus on Industry Program, WorkCover NSW launched the Road Freight Transport Industry Action Plan 2013 (the Plan) to address this issue. This Plan targets short and long distance and bulk freight sub-sectors of the industry with interventions designed to reduce fatalities, major claims, and musculoskeletal disorders.

SafeWork NSW team members worked with TARS and other industry, community and regulators to influence industry practices, achieve sustainable cost effective outcomes that aligned with the Australian Work Health and Safety Strategy 2012-2022.

From June 2013 to December 2014 the Plan targeted four key issues: onsite traffic management, manually loading/unloading trucks, driver wellness and return to work/injury management.

Solutions developed in consultation with social and regulatory partners include:

- targeted rebates
- safety coaching
- guidance material
- practical demonstrations of safety solutions
- sponsorships and driver wellness campaign
- communication/media awareness campaign using a case study approach
- an inspector visit program - providing onsite advice/ guidance, case management for high risk businesses and a follow up visit program to secure change.

TARS Research is pleased to have assisted in the development of this important initiative. The Certificate of Appreciation was awarded by Mr Peter Dunphy, Executive Director of SafeWork NSW, at a project closure event on the 29th October, 2015 at the Australian Technology Park in Sydney.

Academic Staff

Prof Ann Williamson: has a PhD in behavioural science and has worked in government and academia in research and policy development in injury prevention for over 30 years. She has a national and international reputation for research in road and occupational safety. This is due in part to contributions to the fields of fatigue and human factors and safety, using innovative methods.

Prof Raphael Grzebieta: obtained his PhD in engineering focussing on crashworthiness. He has 30 years of research and professional experience in road safety, road and vehicle crashworthiness, and crash investigations and reconstruction. His work has influenced policy in the areas of quad bike safety, motorcyclists impacting roadside barriers, installation of wire-rope barrier systems, roadside barrier crashworthiness, rollover crashworthiness, heavy vehicle safety, bicycle and cycling infrastructure safety, motorcycle safety and vehicle occupant safety.

A/Prof Teresa Senserrick: has a PhD in Psychology with over 20 years of experience in health and safety research. She is nationally and internationally renowned for her expertise in driver education, training and licensing, with a particular focus on disadvantaged groups, including youth, Aboriginal, low socio-economic, rural and remote road users. Her research also contributes to increasing the safety of vulnerable road users, including pedestrians and cyclists and particularly novice motorcyclists.

Dr Julie Hatfield - Senior Research Fellow: has a PhD in Psychology and over 20 years' of experience of health and safety research. Her innovative behavioural research has contributed to understanding of risky driving behaviour, young driver safety, and safety of active transport (walking and cycling). She has extensive experience with conducting and communicating research to address policy needs.

Dr Mike Bambach - Senior Research Fellow: has a PhD in Engineering and has substantial experience with regard to vehicle rollover crashes, motorcyclist impacts into roadside infrastructure, injury biomechanics and deformation of vehicle structures in collisions. He has recently also gained considerable experience in the 'Health data and epidemiology' stream, particularly with regard to the linking and epidemiological analyses of large administrative databases.

Dr Soufiane Boufous - Senior Research Fellow: has a Masters in Public Health and a PhD in Epidemiology. His research focuses on developing innovative methods to assess the burden and risk factors of injury and evaluate injury prevention programs in road safety. He has developed methods based on the use of data linkage to integrate relevant data systems and undertaken observational studies and randomised trials to examine risk factors of road trauma and assess the impact of preventive strategies.

Dr Mario Mongiardini - Research Fellow: has worked in the field of roadside safety barrier systems and complex finite element (FE) computer simulations of crash events for 10 years. He has specialised in both testing and simulating vehicle full-scale crash tests of roadside safety hardware. In particular, he has actively worked on the development of various vehicle and barrier FE models as well as preparation of the US standard for Verification and Validation (V&V) of numerical FE models for roadside safety barriers throughout the USA.

Dr Rena Friswell - Research Fellow: has worked as a behavioural scientist in road and occupational safety research for over 15 years, both in university and government organisations. Her primary research interest is driver fatigue, but she has also investigated aspects of driver distraction, fleet safety, repeat offending and the effects of public safety interventions. She has expertise across a range of methodological approaches for understanding road users (broad scale surveys, dataset analyses, and laboratory and workplace studies).

Ms Lori Mooren - Senior Research Fellow: has been working in road safety for 25 years. She was awarded a Fellowship in 2012 by the Australasian College of Road Safety for her outstanding achievements. Lori was Project Manager for the production of a Global Good Practice Manual on Speed Management and is a member of the UN Road Safety Collaboration, and co-chairs the Pillar 1, Road Safety Management Project. She has established a research program that aims to develop and test safety management systems and interventions to improve work related road safety, particularly in heavy vehicle transport operations.

Dr Garrett Mattos - Postdoctoral Research Associate: has 8 years of experience in rollover crashworthiness testing and research. His current research interests include injury biomechanics, vehicle safety systems, and epidemiology relating to road safety. Garrett's work often involves the use of a combination of full-scale crash and component testing, finite element analysis, and real-world crash data. He recently finished his PhD at UNSW in which he characterised head injuries that occur in rollover crashes and evaluated the feasibility of reproducing them in a dynamic rollover test. Garrett is continuing his research into rollover crashworthiness and assisting with the Australian Naturalistic Driving Study (ANDS).

Adjunct Appointees

Prof Mike Regan: is a psychologist with 25 years' experience in transportation safety, in Australia and in Europe - as a researcher, research manager and policy maker. He has specialist research expertise in driver distraction and inattention, human interaction with intelligent transport systems, use of instrumented vehicles and simulators to study driving behaviour and performance, and driver and rider training. He has authored more than 160 peer-reviewed publications, including 3 books, sits on the Editorial Boards of 5 peer-reviewed journals.

Prof Soames Job: is nationally and internationally road safety expert with 33 years of road safety experience. He is recognised for his achievements in road safety management, delivery, policy and research, and for noise effects research and policy. He brings a unique combination of skills in consulting, policy, road reviewing, regulation and legislation creation and management, and direct delivery of road safety programs and projects as well as recognised expertise in road safety research and evaluation, teaching, group leadership, and mass media messaging for behaviour change.

Prof Bruce Simons-Morton: Dr Simons-Morton is both Associate Director for Prevention as well as Chief of the Health Behavior Branch of the Eunice Kennedy Shriver National Institute of Child Health and Human Development. He is also Chair of the Committee on Operator Education and Regulation of the Transportation Research Board (TRB; Board of the National Research Council and National Academies) in the United States; the peak international body for academics specialising in road safety.

A/Prof George Rechnitzer: has over 40 years of professional engineering experience, academic and research expertise, as well as extensive industry affiliations both nationally and internationally. He has expertise in forensic and safety engineering, road safety and workplace safety, accident investigation and collision reconstruction.

Performance Targets and Achievements

Publications

During 2015 TARS Research continued to have an impact in peer-reviewed publications. A complete list of all research outputs is contained in **Appendix F - Academic Publications and Presentations**.

Research Income

During 2015 TARS continued to attract research income from a variety of sources. A more detailed list of projects is provided in **Appendix D - Research Grants and Funding**.

Transport and
Road Safety
(TARS) Research

Engagement and Impact

Research Dissemination

By undertaking high-quality research that benefits society, TARS Research excels at translating fundamental science into new, evidence-based policy and practice. We are recognised as being amongst the world's best transport and road safety researchers, and play a crucial role in equipping government and industry to contribute to NSW, Australia and the world.

Australian NDS Launch

The launch of the Australian Naturalistic Driving Study (ANDS) was held on 21 April with attendees including Mr John Sidoti (NSW Parliamentary Secretary for Roads and Transport), Prof Ian Jacobs (Vice Chancellor, UNSW Australia) and senior representatives of most of the funding partner organisations. This aim of this project is to study everyday driving behaviour and examine how drivers react interact with normal demands of driving including interactions with other road users like pedestrians and cyclists as well as sudden and unexpected events. It is funded by Australian Research Council Linkage Infrastructure, Equipment and Facilities scheme and Linkage Project scheme grants with industry funding from six organisations with total funding of \$4 million. TARS Research is the lead organisation in collaboration with four other universities including Virginia Tech Transport Institute.

Seminar and Workshop Series

TARS Research undertakes an active role in research dissemination and facilitating the translation of research into policy and practice. Our outreach activities (**Appendix E - TARS Seminar and Workshop Series**) bring together stakeholders and experts – both Australian and international – to ensure UNSW Australia remains an influential leader in the field.

Invited Lectures and Presentations

1. **Senserrick, T.** (2015) Human Factors Workshop: Is GDL Needed for Older Novice Drivers in the U.S.: Existing Evidence and Burning Research Questions. Transportation Research Board 94th Annual Meeting, Washington DC, 11 January 2015.
2. **Mooren, L.** (2015) *Research History on the Relationship between Driver Compensation Levels and Safety (P15-6965)*. Committee on Truck and Bus Safety (ANB70), Washington DC, 13 January, 2015.
3. **Senserrick, T.** (2015) VicRoads New Motorcycle Graduated Licensing System. Presentation to Victorian Motorcycle Training Providers. VicRoads, Kew VIC, 20 February 2015.
4. **Mooren, L.** (2015) *Research on Heavy Vehicle Safety*. Teleconference presentation to Australian Trucking Association (ATA) Safety Committee Meeting No. 2, 25 May, 2015.
5. **Williamson, A., Grzebieta, R.** (2015) *Road Safety Research at TARS*. Chalmers University of Technology, 15 June, 2015.
6. **Williamson, A.** (2015) Invited attendee at the National Road Safety Forum. Sydney, 4 August, 2015.
7. **Mooren, L.** (2015) *Safe System vehicle and fleet safety*. LeasePlan Interactive 2015, Sydney, 7 August, 2015.
8. **Williamson, A.** (2015) Systems HFE: Deciding what to tackle (first). Invited participant in a Workshop on Complex Systems and Human Factors and Ergonomic: Challenges and Opportunities. International Ergonomics Association meeting. Melbourne, 9-14 August, 2015.
9. **Mooren, L.** (2015) *Safe System vehicle and fleet safety*. LeasePlan Interactive 2015, Melbourne, 14 August, 2015.
10. **Mooren, L.** (2015) *Important safety management characteristics for truck operations*. ALC Supply Chain Safety & Compliance Summit, Sydney, 27 August, 2015.
11. **Senserrick T.** *GDL in Australia: Success introducing the first “full” model*. International Symposium: Implementing a New GDL Framework. National Safety Council (U.S.) and Traffic Injury Research Foundation (Canada), Omni Hotel, Nashville TN; 27-29 August 2015.
12. **Grzebieta, R.** (2015) *Motorcyclist impacts into roadside barriers*. Workshop of the Swedish Road Barrier Association, Jonkoping, 6 October, 2015.
13. **Senserrick, T.** (2015) *VicRoads New Motorcycle Graduated Licensing System: Pre-Learner Curriculum and Progress Report*. Presentation to Victorian Motorcycle Training Providers. Stay Upright, Hoppers Crossing VIC, 17 November 2015.
14. **Mooren, L.** (2015) *Integrating people into a safe system of work*. Gas 2015: Delivering Energy Diversity, Sydney, 26 November, 2015.
15. **Grzebieta, R.** (2015) *The Australian Quad Bike Performance Project*. Quad Bike Safety and Injury Prevention Symposium, 12th Australasian Injury Prevention and Safety Promotion Conference, Sydney, 27 November, 2015.

Submissions and Contributions to Policy Development

1. **Williamson, A., Grzebieta, R., Olivier, J., Rechnitzer, G.** (2015) *Submission to Inquiry into aspects of road safety in Australia*. APH Senate Standing Committee on Rural and Regional Affairs and Transport References Committee, 2 March 2015.

Following our submission to Inquiry into aspects of road safety in Australia by Commonwealth Senate Standing Committee on Rural and Regional Affairs and Transport References Committee, Professors Grzebieta and Williamson were invited to make a presentation to the Senate Standing Committee in Canberra in September.

2. Ann **Williamson** and Lori **Mooren** met with a delegation of representatives of New Zealand road safety authorities on issues relating to speeding (26 May, 2015).
3. de Rome L, McRae D, **Senserrick T**, McTiernan D, Haley J, Meredith L, Williams B. (2015) *Submission to Inquiry into Motorcycle Safety in NSW*. Australasian College of Road Safety NSW (Sydney) Chapter. Joint Standing Committee on Road Safety (StaySafe), 9 September 2015.
4. Olivier, J., **Grzebieta, R., Boufous, S.** (2015) *Submission to Inquiry into Personal choice and community impacts*. APH Senate Standing Committees on Economics, 18 September, 2015.

Prof Grzebieta, together with A/Prof Jake Olivier from the UNSW School of Mathematics and Statistics presented a submission and appeared before the Commonwealth Senate Economics Reference. This submission and presentation focused on the Mandatory Bicycle Helmet Law, in particular the efficacy of bicycle helmets in reducing brain injury in crashes.

5. **Grzebieta, R., Williamson, A.** (2015) *Submission to Inquiry into Motorcycle Safety in NSW*. Joint Standing Committee on Road Safety (StaySafe), 2 October 2015.

We presented a submission and appeared before the NSW Parliamentary Staysafe Committee on inquiry into Motorcycle Safety (Prof Williamson and Grzebieta). A number of the points we raised were included in the final report released in late November.

6. NSW Joint Coronial inquest into deaths arising from the use of quad bikes
Prof **Grzebieta**, Adjunct Prof **Rechnitzer** and Mr Keith **Simmons** gave evidence including a 130 page report on nine cases involving fatalities due to quad bike accidents to a NSW Joint Coronial inquest into deaths arising from the use of quad bikes'. The finding presented on 26th November drew strongly from the evidence presented by the TARS Research team.
7. Prof **Grzebieta** and Adj/Prof **Rechnitzer** held a meeting with the Indonesian Minister for Transport Ignatius Jonan on common road safety issues.
8. Prof **Grzebieta** and Adj/Prof **Rechnitzer** successfully defended the introduction of go-kart and go-kart barrier crash test requirements into the Australian Standard despite significant opposition from go-kart track owners and manufacturers. The Draft Standard on go-karts, including the requirement for testing, is about to be released.
9. Prof **Grzebieta** and Adj/Prof **Rechnitzer** successfully defended to road regulators the introduction of truck under-run barrier testing into the Australian Standard for 'Road safety barriers systems and devices'
10. In her role as part-time industry member of the Road Safety Remuneration Tribunal, Prof **Williamson** is on a Full Bench of the Tribunal currently considering a Draft Contractor Driver Minimum Payments Road Safety Remuneration Order.

Conference Sponsorship

Inaugural 2015 Australasian Road Safety Conference (ARSC2015), Gold Coast Convention and Exhibition Centre, QLD, from 14-16 October 2015.

Media Profile and Engagement

As recognised experts in transport and road safety, the perspectives of our researchers are highly sought after by the media. **Table 2** summarises the level of our media profile and engagement. However, it should be noted that this underestimates our impact. With stories picked-up and disseminated by numerous other outlets it is not possible to measure the impact of our research in the media.

Table 1: Counts of various engagements with print, radio, TV and other media during 2015.

Mr Rainer Zeller

Appendix B - External Appointments

Memberships of Professional Bodies and External Committees

Prof Ann Williamson

Industry Member, Road Safety Remuneration Tribunal, Fair Work Australia

Member, Australian Injury Prevention Network Executive Committee

Member, NHMRC Assigners Academy

Member, NHMRC Translation College of Experts

Member, US Academy of Sciences Transportation Research Board's Safety Performance Committee ANB25

Member, US Academy of Sciences Transportation Research Board's Safety Data, Analysis and Evaluation Committee ANB20

Prof Raphael Grzebieta

Co-Chairman, US Academy of Sciences Transportation Research Board's Sub-committee on Rollover Crashworthiness ANB 45 (1)

Member Aus. Standards Committee CE/85 Automotive Child Restraints

Member Aus. Standards Committee CS/75 Automotive Occupant Restraints

Member Aus. Standards Committee ME/83 Motor Vehicle Frontal Protection Systems

Member Aus. Standards Committee ME/83-01, ISO Australian Reviewing Committee ISO/TC22/SC10 Impact Test Procedures

Member Aus. Standards Committee ME-051 Amusement Rides and Devices

Member Aust. Standards Committee CS/076 Protective Helmets for Vehicle Users

Member Australian/NZ Standards Committee CE/33 (AS/NZS 3845) Road Safety Barrier Systems

Member, Australasian College of Road Safety Executive Committee

Member, US Academy of Sciences Transportation Research Board's National Cooperative Highway Research Program Panel 22-26 - motorcycles crashes into roadside barriers (2008-present)

Member, US Academy of Sciences Transportation Research Board's Occupant Protection Committee ANB45

Member, US Academy of Sciences Transportation Research Board's Roadside Safety Design Committee AFB20

Member, US Academy of Sciences Transportation Research Board's Roadside Safety Design Computational Mechanics sub-Committee AFB20(1)

Member, US Academy of Sciences Transportation Research Board's Roadside Safety Design International sub-Committee AFB20(2)

A/Prof Teresa Senserrick

Friend, US Academy of Sciences Transportation Research Board's Global Road Safety Committee

Friend, US Academy of Sciences Transportation Research Board's Motorcycles and Mopeds Committee

Friend, US Academy of Sciences Transportation Research Board's Towards Zero Deaths Subcommittee

Member, Australasian College of Road Safety Australasian Executive Committee

Member, Australian Injury Prevention Network

Member, Evaluation Steering Committee, Driving Change: Licensing Support Program, The George Institute for Global Health

Member, International Council on Alcohol, Drugs & Traffic Safety

Member, National Health and Medical Research Council of Australia Research Translation Faculty

Member, Road Safety Education Australasia, Advisory Council to Board

Member, Road Safety Policy Committee, US Association for the Advancement of Automotive Medicine

Member, US Academy of Sciences Transportation Research Board's Committee on Operator Education and Regulation\

Member, US Academy of Sciences Transportation Research Board's Young Driver Subcommittee

Dr Julie Hatfield

Member, Australasian College of Road Safety National Executive Committee

Member, Standards Australia Committee CS-110 Bicycles

Ms Lori Mooren

Co-chair, Alternative Compliance Subcommittee, US Academy of Sciences Transportation Research Board

Co-chair, Global Road Safety Subcommittee, US Academy of Sciences Transportation Research Board

Fellow, Australasian College of Road Safety

Chair, International Subcommittee and Member, Organising Committee, Australasian Road Safety Conference, 2016

Member, Truck & Bus Safety Committee, US Academy of Sciences Transportation Research Board

Member, United Nations Road Safety Collaboration

Dr Soufiane Boufous

Chapter Representative, NSW Chapter - Australasian College of Road Safety (ACRS)

Member, Australasian College of Road Safety (ACRS)

Member, International Collaborative Effort (ICE) on Injury Statistics and Methodology

Member, Global Burden of Diseases and Injury Group

Dr Mario Mongiardini

Friend, US Academy of Sciences Transportation Research Board's Roadside Safety Design Committee AFB20

Friend, US Academy of Sciences Transportation Research Board's Roadside Safety Design Computational Mechanics sub-Committee AFB20(1)

Friend, US Academy of Sciences Transportation Research Board's Roadside Safety Design International sub-Committee AFB20(2)

Friend, US Academy of Sciences Transportation Research Board's Rollover Crashworthiness sub-Committee ANB45(1)

Dr Garrett Mattos

Chapter Representative, NSW Chapter - Australasian College of Road Safety (ACRS)

Member, Australasian College of Road Safety (ACRS)

Friend, US Academy of Sciences Transportation Research Board's Occupant Protection Committee ANB45

Friend, US Academy of Sciences Transportation Research Board's Rollover Crashworthiness sub-Committee ANB45(1)

Friend, US Academy of Sciences Transportation Research Board's Roadside Safety Design Committee AFB20

Friend, US Academy of Sciences Transportation Research Board's Roadside Safety Design Computational Mechanics sub-Committee AFB20(1)

Friend, US Academy of Sciences Transportation Research Board's Roadside Safety Design International sub-Committee AFB20(2)

Member, Tau Beta Pi Engineering Honour Society

Advisory Boards

Prof Ann Williamson

Member, Counting Rules Working Group for the National Transport Commission

Member, Fatigue Advisory Industry Group, National Rail Regulator

Member, Independent Expert Panel to the National Heavy Vehicle Regulator

Member, Management Board, Centre for Health Systems and Safety Research

Member, Surf Life Saving Australia (SLSA), Research Advisory Committee

Prof Raphael Grzebieta

Executive Board Member International Safe Systems Institute for Road Safety (2012-2015)

Ms Lori Mooren

NSW WorkCover Road Freight Transport Action Plan Partner

Editorial Boards

Prof Ann Williamson

Member of Editorial Board, Aviation Psychology and Applied Human Factors

Member of Editorial Board, Ergonomics Australia

Member of Editorial Board, Journal of Safety Research

Member of Editorial Board, International Open Access Journal 'Safety'

Prof Raphael Grzebieta

Editor-in-Chief, International Open Access Journal 'Safety'

Member Editorial Board, Journal of Bridge Engineering

Member of Editorial Board, Australian Journal of Structural Engineering

Member of Editorial Board, International Journal of Crashworthiness

Member of Editorial Board, Journal of Transportation Safety & Security

Member of Editorial Board, The Electronic Journal of Structural Engineering

Peer-Review Editor in Chief, Journal of the Australasian College of Road Safety

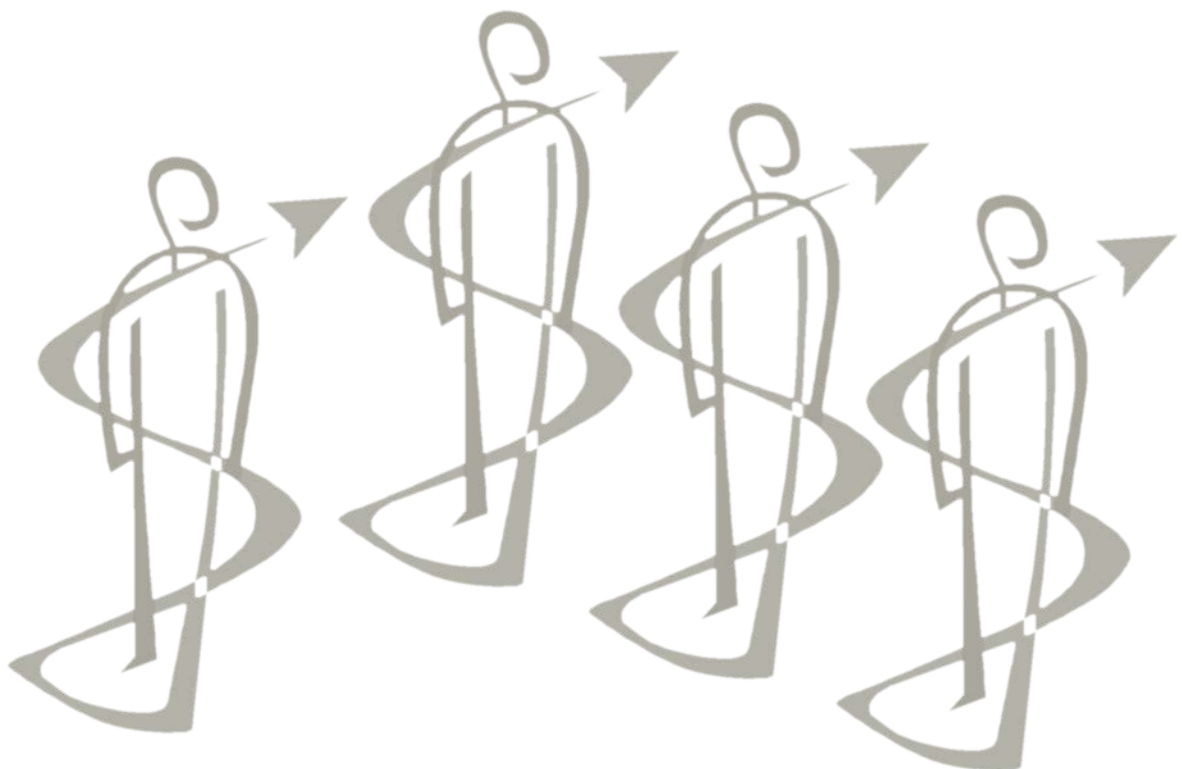

Member Editorial Board, Accident Analysis and Prevention

Member Editorial Board, International Journal of Forensic Engineering

A/Prof Teresa Senserrick

Associate Editor, BMC Public Health

Guest Editor, Safety

Appendix C - Postgraduate Students

Postgraduate Research Projects

Mr Thomas Bayley

Project: Improving road side barriers for heavy vehicle road safety

Supervisor: Prof Raphael Grzebieta

Ms Amy Chung

Project: Human Factors and Ergonomics as a Scientific Discipline: The Relationship between Theory, Research, and Practice.

Supervisor: Prof Ann Williamson

Mr David Hicks

Project: Assessing the suitability of quad bikes for the farming environment.

Supervisor: Prof Raphael Grzebieta

Mr Faisal Magableh

Project: An investigation into human factors influencing driver behaviour and traffic law enforcement in Jordan

Supervisor: Prof Raphael Grzebieta

Mr Garrett Mattos

Project: Characteristics of serious head injuries in pure rollover crashes and an evaluation of their replication in a dynamic rollover test

Supervisor: Prof Raphael Grzebieta

Ms Lori Mooren

Project: An evidence-based safety management system for heavy truck transport operations.

Supervisor: Prof Ann Williamson

Ms Nikki Olsen

Project: Close enough is not good enough: improving the reliability of accident and incident classification systems in high hazard industries.

Supervisor: Prof Ann Williamson

Mr Mathew Petrenko

Project: Influence of culture on pilot training

Supervisor: Prof Ann Williamson

Ms Louise Raggett

Project: Normal Operations Monitoring: A New Approach to Measuring and Managing Human Performance Tested in Aviation Ground Safety

Supervisor: Prof Ann Williamson

Ms Louise Shaw

Project: An application of the safe system approach to cycling safety: A cohort study of NSW cyclists.

Supervisor: Dr Julie Hatfield

Mr Keith Simmons

Project: Occupant protection in rollover crashes

Supervisor: Prof Raphael Grzebieta

Ms (Vivien) Ye Shi

Project: Built environment characteristics and child pedestrian safety around schools

Supervisor: A/Prof Teresa Senserrick

Mr Tana Tan

Project: Assessing the biofidelity of current anthropomorphic test devices in predicting head, thoracic and spinal injuries in rollover accidents.

Supervisor: Prof Raphael Grzebieta

Ms Kim Thai

Project: Biomechanical Review of Test Methods Used in the Evaluation of Protective Helmets for Bicycle and Motorcycle Users

Supervisor: Prof Ann Williamson

Mr Rainer Zeller

Project: The relative contributions of endogenous and exogenous factors on operator fatigue

Supervisor: Dr Rena Friswell.

Advanced Road Safety Investigation Course

Speakers: Raphael Grzebieta, George Rechnitzer, Andrew McIntosh

Date: 25-29 May 2015

Abstract

This project designed, developed and delivered a course on crash investigation for road safety professionals in Indonesia for the Australian Transport Safety Bureau.
